SUMMARY

Full-Stack & Mobile App Developer with around 2 years of hands-on experience in web and mobile application development. Skilled in building scalable end-to-end solutions, REST API integrations, and performance-optimized applications using modern JavaScript frameworks and cross-platform mobile technologies.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Dart, HTML, CSS
- Frameworks & Libraries: React, Next.js, Angular, Flutter, React Native, Expo, Node.js, Express.js
- Backend & APIs: REST APIs, JWT Authentication, API Integration
- Databases: MongoDB, MySQL
- Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman, Hoppscotch
- Cloud & Deployment: AWS, Firebase, Vercel, GitHub Actions, CI/CD Pipelines
- Mobile App Deployment: Google Play Store, Apple App Store Deployment
- State Management: Redux, Provider, Zustand

PROFESSIONAL EXPERIENCE

Web & App Developer | Cypher Info Solution - Remote (Mar 2025 – Present)

- Developed scalable web and mobile applications using React, React Native, Flutter, Node.js, and SQL.
- Built and integrated secure REST APIs and backend services for business applications.
- Delivered responsive and performance-optimized e-commerce platforms for clients.
- Improved application speed and user experience through code and state management optimization.
- Implemented authentication systems, database management, and third-party API integrations.

Full-Stack Developer | Matajar Group – Dubai, UAE (Apr 2025 – Jan 2026)

- Developed and deployed scalable full-stack applications using React, Angular, Flutter, and Node.js.
- Configured CI/CD pipelines using GitHub Actions for automated deployment.
- Improved UI performance and optimized page load time for user engagement.
- Implemented secure authentication and REST API integrations.

Full-Stack Developer | DRUV 360 – Kerala (Sep 2023 – Jan 2024)

- Built and maintained full-stack web applications using React.js and Node.js.
- Integrated third-party APIs and enhanced system reliability.
- Improved state management and UI efficiency.

PROJECTS

Dcars – Rent-a-Car Mobile & Web Platform

Flutter | React | Node.js | MongoDB | AWS

- Developed a rental platform enabling users to browse, book, and manage car rentals.
- Architected and maintained a scalable backend hosted on AWS for security and performance.
- Built the admin dashboard for fleet management, pricing, booking automation, and reporting

Dexpress – Grocery & Investment E-commerce App

Flutter | Angular | Node.js | MongoDB | AWS

- Created a grocery app integrated with an investment rewards system.
- Built an admin panel for inventory control and analytics.
- Improved order flow efficiency and backend performance.

Mom's and Wives – Skills Marketplace

Flutter | React | Node.js | MongoDB | AWS

- Built a scalable online marketplace for women entrepreneurs to list and sell handmade products.
- Optimized architecture and onboarding workflow, leading to 250K+ active users and rapid growth in the first 6 months.

Venture – AI Itinerary Builder

Next.js | Tailwind CSS | Node.js | MongoDB | OpenAI | Vercel

- Built an AI-powered travel planner generating dynamic itineraries.
- Integrated Pexels API for visual content.
- Enhanced itinerary generation speed by 40%.

EDUCATION

Bachelor of Computer Science | Calicut University | 2021 – 2024

ACHIEVEMENTS

- Recognized for delivering high-quality solutions under tight deadlines.
- Self-taught developer with multiple production-level deployments.
- Continuous learner focused on AI, automation, and cloud scaling.
